Nutrition API :

The screenshot shows the RapidAPI website interface. At the top, there's a navigation bar with the RapidAPI logo and a search bar. Below this, the 'Recipe - Food - Nutrition' API is featured. It has a 'FREEMIUM' badge and a 'Verified' status. The API is by David, updated 8 days ago, and is featured in 'Food & Restaurant' apps. The popularity is 9.8 / 10 and the latency is 723ms. The user's profile is visible on the right, showing the name 'PRADEEPA.S 19ITR034' and the email 'pradeepas.ug19.it@francisc Xavier.ac.in'. The API documentation is displayed below the header, explaining that the Spoonacular Recipe - Food - Nutrition API provides access to thousands of recipes, storebought packaged foods, and chain restaurant menu items. It also mentions special diets/dietary requirements currently available, including vegan, vegetarian, pescetarian, gluten free, grain free, dairy free, high protein, low sodium, low carb, Paleo, Primal, ketogenic, and more.
